## PROFILE

As a budding frontend web developer, my passion lies in creating captivating digital experiences through the power of code and design. I'm dedicated to learning and mastering the fundamental languages and technologies that shape the online world, with a focus on building visually appealing and user-friendly websites.

## PROJECTS

- e-bhart e-commerce website |**  
**live demo | git repo**
  - using html , css , javascript , reactjs , tailwind css , material ui , redux , firebase.
  - for authorization i created protected routes for both user and admin
  - to avoid prop drilling i used context api
  - for admin dashboard email : adminravi@gmail.com password : adminravi@gmail.com
- TODO LIST WEBAPP |**  
**git repo**
  - using html , css , javascript , react js
  - all the crud operations are implemented in this webapp
- DICE GAME |**  
**git repo**
  - using html , css , javascript , react js
  - when you start the game you have to choose a number then you have to role the dice by clicking it . if the choosen number and the number you get on the dice are same your score will be increased by the number that you got on dice . if the choosen number and the number you get on the dice are not same your score will be decreased by 2 .
